Artist Ron Ukrainetz is offering a beginning to intermediate engraving workshop on Claybord, (mis-named Scratchboard). This workshop taps the experience of Ron's 30+ years in the media.

This two day workshop will take each student from the basic surfaces, tools, techniques, and styles through to a finished project. Each student will learn to understand contrasts, values, and how to create a positive image on the Claybord Black surface. Plus a few secrets of the media will be revealed! This is also a great opportunity for established artists who wish to further their knowledge of negative and positive spaces in any media.

All tools, Claybord, study booklet, and reference materials will be provided. Each enrollee will also receive tools and materials to take home after the workshop has ended.
